

1. Attendees

- Roger Lundberg (EC member)
- Monika Nielsen (Chair, EC member, elected and Ørsted representative)
- Anna Edebo (EC member, E.ON representative)
- Mikko Vepsäläinen (EC member)
- Jørgen Peter Jensen (EC member)
- Arja Lehikoinen (EC member)
- Sara Sjögren (EC member)

2. SIAPWS General Meeting 2022 – March 2022

- The meeting will be arranged remotely on the 24th of March 12:30-15:30 (Danish and Swedish time).
- The presentations (3 times 20 minutes) will focus on analytical equipment:
 - Current analytical system issues and developments (e.g. pH sensors and/or others)
 - The future direction of analytical systems (e.g. Mettler-Toledo)
 - Hydrogen production related issues
- Another possibility is a 1-hour presentation from IAPWS (Barry Dooley)

3. SIAPWS Friday Events – topics for the last two events in 2021

- VTT will discuss internally whether they can give a presentation on failure analysis in December.
- A presentation on guidelines in spring 2022.
- Monika will give a presentation on oil contamination issues and cleaning in November.
- Water recycling effects on demineralisation plants would be a suitable topic for spring 2022.
- We should investigate whether we get a presentation from other national groups.
- Cooling water systems could be an interesting topic for future presentations.

4. SIAPWS Website – discussion on the accessibility to the website (members area)

- Some people have had issues with logging in. It was suggested that there could be one password (shared) for the members' area. An issue with this is that we wouldn't have any control over who has access to the site.

5. Next meeting

- The next meeting will be on the 10th of December.
